How to Make a Snowflake Pattern

These directions are just to teach how to make snowflakes from paper circles. To make the Lutradur ornaments, there is additional instructions for working with Lutradur.

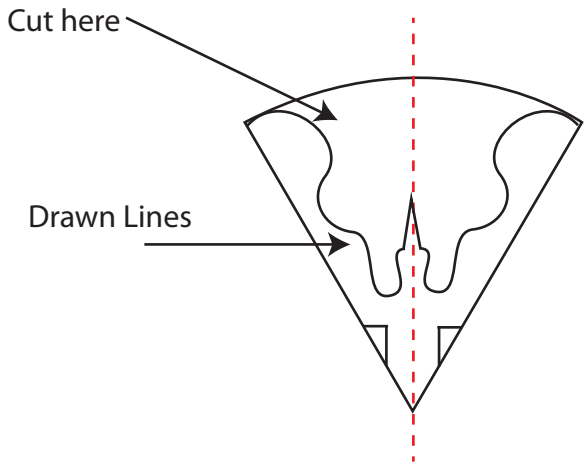

Cut a circle the finished size of the diameter of your snowflake.

Fold paper in half as shown. Drawn lines lightly as shown. The lines are at 60º angles. These lines are the fold lines for creating the snowflake.

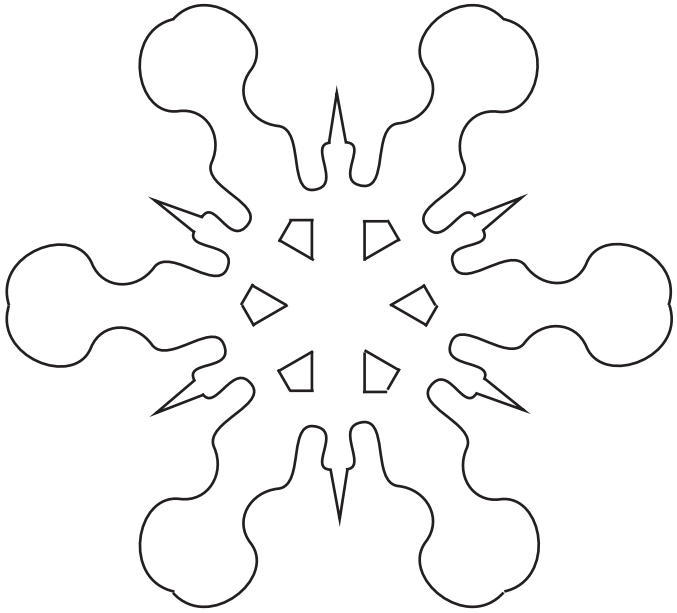

Fold sections on fold lines. Draw your design on the folded section as shown. Draw just half the design then flip it so you have matching sides. Cut away the excess paper through all layers. The folded edges will hold the snowflake together.

Unfold your snowflake and reveal the beautiful design.

Directions for creating snowflakes with Lutradur

Because of the thickness of two fused layers of Lutradur, it would be difficult to fold the same way as making paper snowflakes.

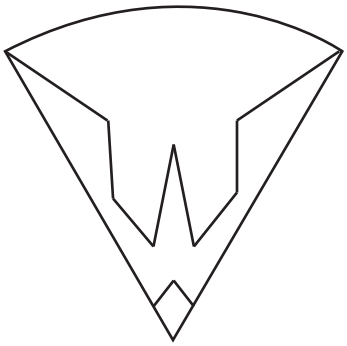

Cut two 4 1/2" pieces of heavyweight Lutradur. Cut one 4 1/2" piece of Pellon Wonder Web. Place the Wonder Web between the two pieces of Lutradur and fuse. Trace design onto Lutradur with pencil.

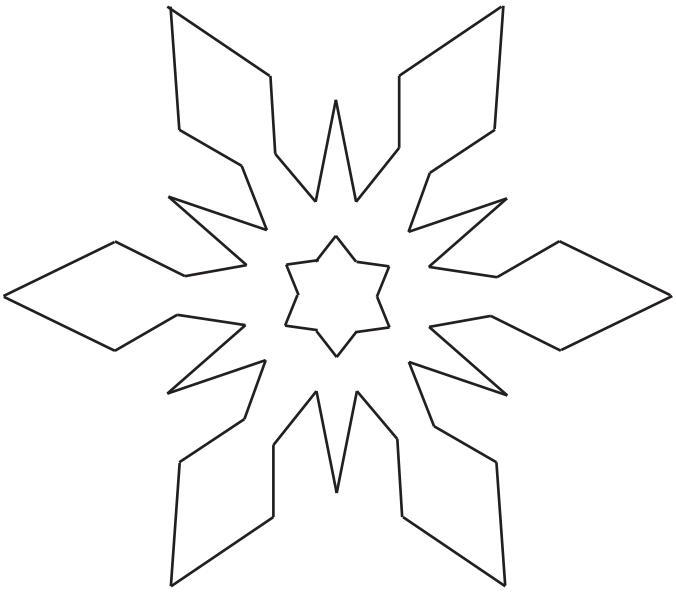

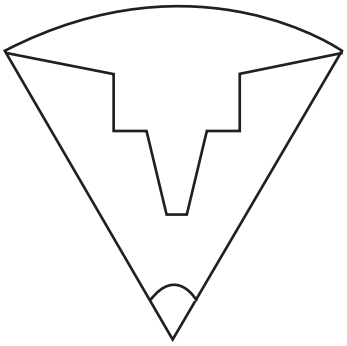

Cut snowflake out using tiny very sharp scissors. Color snowflake if desired with markers or glitter pens. Attach hot fix crystals if desired. Heat set markers if used. Punch one hole on longer arm of snowflake. Attach string through hole for hanging.
