cuttopieces.blogspot.com

This project allows you to transform any ordinary bookcase into a complete custom piece using just one product, EZ-Steam® II, and your favorite fabric. Let your imagination guide you and create a one of a kind piece for the perfect spot in your home.

Fabrics Needed
Fabric as needed to cover the back of chosen furniture piece.

Materials Needed
Matching amount of EZ-Steam II

Tools Needed
Iron
Scissors/Rotary Cutter

Instructions

Step 1. Measure the back of selected furniture piece. It is easiest to recover if backing can be removed, but can also be done in sections if shelves are attached or to the back with shelves removed (as will be shown).

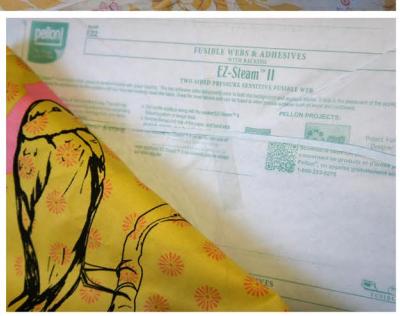

Step 2. Cut fabric to fit the back of the piece. Be sure to note if fabric is directional and account for that.

Step 3. Measure and cut EZ-Steam® II to fit the fabric piece. Align the pieces so that they don't overlap. Note that EZ-Steam II comes in a 12" width. Example needed 3 widths x length of the bookcase back.

Step 4. Iron fabric flat, remove one paper backing from EZ-Steam II and position onto wrong side of fabric. Repeat until fabric is fully covered with EZ-Steam II.

Step 5. Remove second paper backing and line up fabric on the bookcase back. Press into place with your hand.

Note: For large bookcases, do this in small sections. Do not take too much of the paper backing off at once as the product will stick to itself.

Step 6. Use a hot iron to press the fabric in place.

Step 7. Enjoy your new custom furniture!!
